## Security and Beauty All In One

Illusions Vinyl Fence is compliant with ASTM F964-09, which is considered the “end all, beat all” testing specification for vinyl fence. The purpose of this specification is to establish a recognized standard of quality for exterior vinyl profiles for use in assembling agricultural, commercial, and residential fencing and railing.

100% Pure Virgin Vinyl Illusions Fences are manufactured to the highest testing standards in the world. Created to maintain their structural integrity and color retention over years and years of use. This rigorous testing has made Illusions a perfect fit for Landscape Architects and Fence Contractors for almost all Commercial fence applications.

## Mix 'n' Match™ Curves & Colors

Illusions® Vinyl Fence Mix 'n' Match™ Curves & Colors System isn't just a clever marketing tool dreamed up by ad execs to sell more fences. It's provides a real life, project by project solution to compliment the property or structures of any given installation. Notice in the above photo how the arches of the VBF300-6BW fence perfectly compliment the arched windows of the building. Then notice how the white rails and posts with beige panels matches the framing around the windows and doors.

All *Illusions*® Gate Hardware is custom designed to our specifications and manufactured using only the highest quality materials that are held to the same rigorous standards we use for all of our products. Many of our products are available in both black and white. Always use a Vinyl Gate Stopper (VGS) and two sets of Drop Rods (DRAS) on double drive gates.

# SPECIFICATIONS

## WHAT IS ASTM F964-09?

### Scope

ASTM F964-09 is considered the “end all, beat all” testing specification for vinyl fence. The purpose of this specification is to establish a recognized standard of quality for exterior vinyl profiles for use in assembling agricultural, commercial, and residential fencing and railing. This specification covers Illusions Vinyl Fence sections and the EverStrong Profiles used to fabricate them.

### Materials

Illusions Vinyl Fence Products are manufactured using Rigid Poly Vinyl Chloride (PVC) compounds for exterior-profile extrusions that meet the requirements of ASTM Specification D4216.

### Manufacture

Illusions Vinyl Fence Products are manufactured to meet cell Class 3–30233–23 as defined in Specification D4216. Illusions compounds have higher cell classification because one or more properties are superior to those used in standard acceptable compounds.

**Color/Consistency Testing** – The PVC compound in extruded section shall maintain uniform color and be free of any visual surface or structural changes, such as peeling, chipping, cracking, flaking, or pitting after weathering at intervals of six months and one year for white and for six months, one year, and two years for all other colors in hot, dry climate such as Phoenix, AZ; a hot humid climate, such as Miami, FL; and a temperate northern climate, when tested in accordance with ASTM Performance Weathering Requirements (TABLE 1).

**Weathering Testing** – The PVC compound shall have a minimum impact resistance of 0.6 in.-lb/mil (2670 J/m) after weathering six months and one year in a hot, dry climate such as Phoenix, AZ; a hot, humid climate, such as Miami, FL; and a temperate northern climate, when tested in accordance with ASTM Performance Weathering Requirements. The PVC compound shall have successfully met the weathering requirements prescribed for six months at each climatic testing site prior to use in production of exterior-profile extrusions, when tested in accordance with ASTM Performance Weathering Requirements (TABLE 1).

## ASTM Specifications Met

- D256** - To determine Izod impact properties
- D618** – Practice for Conditioning Plastics for Testing
- D635** – Test Method for Rate of Burning and/or Extent and Time of Burning of Plastics in a Horizontal Position
- D638** - To determine tensile properties
- D648** - To determine heat distortion temperature
- D696** – Test Method for Coefficient of Linear Thermal Expansion of Plastics Between 030°C and 30°C with a Vitreous Silica Dilatometer
- D790** - To determine flexural properties
- D792** - To determine specific gravity
- D883** – Terminology Relating to Plastics
- D1435** – Practice for Outdoor Weathering of Plastics
- D1600** Terminology for Abbreviated Terms Relating to Plastics
- D1784** – Specification for Rigid Poly (Vinyl Chloride) (PVC) Compounds and Chlorinated Poly (Vinyl Chloride) (CPVC) Compounds
- D1898** – Practice for Sampling of Plastics
- D2240** - To determine Shore hardness values
- D2244** – Practice for Calculation of Color Tolerances and Color Differences from Instrumentally Measured Color Coordinates
- D2565** – Practice for Xenon-Arc Exposure of Plastics Intended for Outdoor Applications
- D4216** – Material Class Number 1-32333-3. To establish Cell Classification of PVC material. Illusions compounds have higher cell classification because one or more properties are superior to those used in standard acceptable compounds
- D4226** – Test Methods for Impact Resistance of Rigid Poly-(Vinyl Chloride) (PVC) Building Products
- D4726** – Specification for Rigid Poly(Vinyl Chloride)

(PVC) Exterior-Profile Extrusions Used for Assembled Windows and Doors

E-84-04 - Used to determine the flame spread value of PVC material; Illusions burn rate is significantly lower than allowed value

## Quality Assurance

Illusions Vinyl Fence Products are run through dimensional tests at the startup of a production run and every two hours thereafter including flattening, extrusion quality, impact resistance, warp, color comparison with standard color samples, capstock thickness, and bond testing will be done at the startup of a production and once per shift thereafter with a minimum of two tests per 24 hours of production.

**TABLE 1 - Required Exposures for PVC Extrusions - In Process**

| Color of PVC Extrusions | Exposure Climate       | Required Exposure Times, Months * |
|-------------------------|------------------------|-----------------------------------|
| White                   | hot, dry (Phoenix, AZ) | 6 and 12                          |
|                         | hot, humid (Miami, FL) | 6 and 12                          |
|                         | northern temperate     | 6 and 12                          |
| Any other color         | hot, dry (Phoenix, AZ) | 6, 12 and 24                      |
|                         | hot, humid (Miami, FL) | 6, 12 and 24                      |
|                         | northern temperate     | 6, 12 and 24                      |

\*It is recommended that separate specimens be used for each exposure time.

THESE ARE THE RESULTS FROM AN ACCELERATED WEATHER TESTING CHAMBER IN LABORATORY CONDITIONS

## The Illusions® Vinyl Fence Advantage

This test is run according to ASTM Standard G-155, Cycle #1. All Illusions® Vinyl Fence Product is guaranteed to be made from 100% Pure Virgin Vinyl and assembled according to ASTM F964. Please note the difference in color retention and be assured, Illusions® Vinyl Fence will have uniformed color and be free of any visual surface or structural changes such as: peeling, chipping, cracking, flaking, or pitting after weathering.

Be assured! Insist on *Illusions® Vinyl Fence* Products.

# 75MPH WIND KITS™

**What is the Miami-Dade County High Velocity Hurricane Zone Wind Certification and Why is it Important for Commercial Applications?** - Due to intense hurricanes, the building code specifications for Miami-Dade County, Florida are considered to be the most stringent in the nation. Once approved, this certification provides an extreme competitive advantage that allows for safer installs, more customer confidence, increased closing ratios and decreased repair costs.

## HEAVY WALL POSTS THE STRENGTH BEHIND THE SYSTEM

Majestic™ 8" x 8" and 5" x 5" Heavy Wall Posts

At a whopping .250" wall thickness, the Illusions® 75MPH Wind Adaptor Kit's strength is rooted in the structural integrity of the Illusions® 100% Pure Virgin Vinyl Heavy Wall Posts.

## Illusions® 75MPH Wind Adaptor Kit Patent Pending

Will it hold up to an F5 tornado? Probably not. But in order to be certified, it had to sustain gusts up to 130 MPH for as long as 30-40 seconds. The Miami-Dade 75 MPH certification states that when properly installed, approved styles of Illusions® fencing can withstand sustained 75 MPH winds.

### The Most Available 75 MPH Wind Certified Styles in the World

With 26 Styles available for immediate shipment, Illusions Vinyl Fence has the most Miami-Dade County High Velocity Hurricane Zone Certified styles of vinyl fence available in the world. All of which are 8' wide panels to speed up installation time. Illusions is also the only brand in the world that has 75MPH Certified 8' high vinyl fence sections. Imagine the 8' high applications for Pure Virgin Vinyl Products in multiple colors. The variations are endless and the strength and security unmatched.

### Key West Housing Authority

When the Key West Housing Authority was looking for a vinyl fence, the only fence company they chose to accommodate their rigorous hurricane demands was Illusions® Vinyl Fence.

The request was for an 8' high by 8' wide vinyl fence that could handle hurricane force winds. Complete with 8" x 8" Majestic Posts, Illusions® is certified to handle those specs on more styles and choices than any other brand.
