THROUGH DESIGN!

HIGHPOINT

DECK LIGHTING

The Deck... is an extension of the home, HIGHPOINT DECK LIGHTING provides the means by which customers can carry the same level of design sophistication from the inside of their homes to their outdoor living environment. Offering the most expansive range of deck lighting in the industry, including custom lights, HIGHPOINT models are distinctive and stylish products, not typically available through standard retail outlets. We specialize in matching current fashion trends into our lighting arrangements, so decks can be a true extension of the home's décor.

• *Numerous...* Metal & Glass Options!

The Design... HIGHPOINT offers a refined palette of creative lighting options to help beautify the consumer's living spaces. From classic to contemporary - HIGHPOINT DECK LIGHTING allows our customers the opportunity to express their individual styles throughout their outdoor living areas. We have brilliantly conceived of numerous lighting collections, to fulfill a cohesive design element for an overall pleasing appeal and heightened value to each and every property.

The Environment... As an environmentally conscience manufacturer of high quality exterior lighting fixtures, HIGHPOINT utilizes the latest LED (Light Emitting Diodes) technology to ensure optimal energy efficiency for each lighting fixture. LED lighting technology produces a superior light quality with a low amount of electrical output. These LED lights are 40 times more efficient than incandescent lighting - saving hundreds of dollars over their lifetime!

The Warranty... HIGHPOINT's professional grade deck and landscape lighting is manufactured to meet the highest quality standards to ensure years of long lasting beauty and function. We believe in our product's quality, therefore we offer a limited lifetime warranty on several styles and finishes. This commitment demonstrates our confidence in our craftsmanship, quality of materials and understanding of their performance. Please refer to our website for further information... www.hpdlighting.com/home/warranty.

Installing Lighting Fixtures...

We manufacture all our lighting fixtures in such a way to be a quick & easy install - saving customers valuable time!

• Proper Installation Of Deck Lighting •

Now, let's walk through a basic installation of railing and recessed step lighting. For this presentation we will be using "HIGHPOINT DECK LIGHTING" brand fixtures, model #HP-744R: Pikes Peak Recessed Step Light.

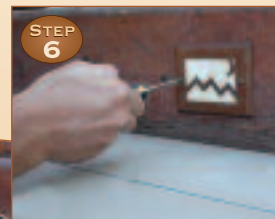

Installation instructions and building code requirements may vary. Please consult your local building department and specific manufacture instructions before installing your lighting. Also note there are many unique and creative ways to hide wire and utilize deck lighting. This article is just one of those ways. For more detailed installation instructions and creative ways of installing "HIGHPOINT DECK LIGHTING", please visit www.hpdlighting.com and click on the installation instruction link.

Deck lights are as much about the beauty they add to a deck, as they are about the light they produce. The lighting fixtures should look almost as good on the deck during the day when there off, as they do at night when there on and glowing. Choose fixtures that appeal to your personal style and home décor.

*Have Fun...
When looking at your beautifully lit deck,
it should make you smile!*

Simple...
Step by Step

BULBS & WIRE NUTS

AC 12V Transformers...

We provide nine superior types of transformers to fit each job, small to large, our transformers will accomplish what it takes!

60W Transformer (HP-60ACT)

This is our NEWEST Transformer!

Features:

Compact 60W, 12V AC transformer, plug-and-go unit, photocell with built-in timer.

- Amazing 3 Year Warranty

Size:

4-1/4" H x 3-1/2" W x 2-1/2" H

It's an easy-to-use, straightforward unit that offers a GREAT VALUE!

60W Inline Transformer (HP-60IT-AC)

Features: 60 Watt, AC, inline transformer, fits nicely into a brick light back box for those occasions you only need one or two fixtures in a location that already has line voltage installed.

- 20W Minimum Load Requirement

100W Transformer (HP-100T)

Features:

Built-in photo eye for dusk to dawn operation, stainless steel case, easy operation, circuit breaker, deep lugs easily accepts (2) 12 Ga. wires for use with multi-runs.

250W Transformer (HP-250T)

Features:

Built-in photo eye for dusk to dawn operation, stainless steel case, easy operation, circuit breaker, deep lugs easily accepts (2) 12 Ga. wires for use with multi-runs.

300W Transformer (HP-300T)

Features:

Stainless steel case, easy access latched door, easy operation, circuit breaker, deep lugs easily accept (2) 12 Ga. wires for use with multi-runs.

500W Transformer (HP-500T)

Features:

Built-in photo eye for dusk to dawn operation, stainless steel case, easy operation, 2-circuits, deep lugs easily accepts (2) 12 Ga. wires for use with multi-runs.

600W Transformer (HP-600T)

Features:

Stainless steel case, easy access latched door, easy operation, 2-circuits, deep lugs easily accept (2) 12 Ga. wires for use with multi-runs.

900W Transformer (HP-900T)

Features:

Stainless steel case, easy access latched door, easy operation, 3-circuits, deep lugs easily accept (2) 12 Ga. wires for use with multi-runs.

- Allow 2 Weeks For Delivery

1200W Transformer (HP-1200T)

Features:

Stainless steel case, easy access latched door, easy operation, 4-circuits, deep lugs easily accept (2) 12 Ga. wires for use with multi-runs.

DC 12V LED Transformers...

Our three DC transformers are an easy to use, straightforward unit that offers a great value all around!

25W LED Transformer (HP-LED-25T)

Features: 25W DC, LED transformer, 12V constant voltage LED driver with plastic casing.

40W LED Transformer (HP-40T)

Features: 40W DC, LED transformer, (1)12V DC circuit with built-in photo cell and powder coated white case

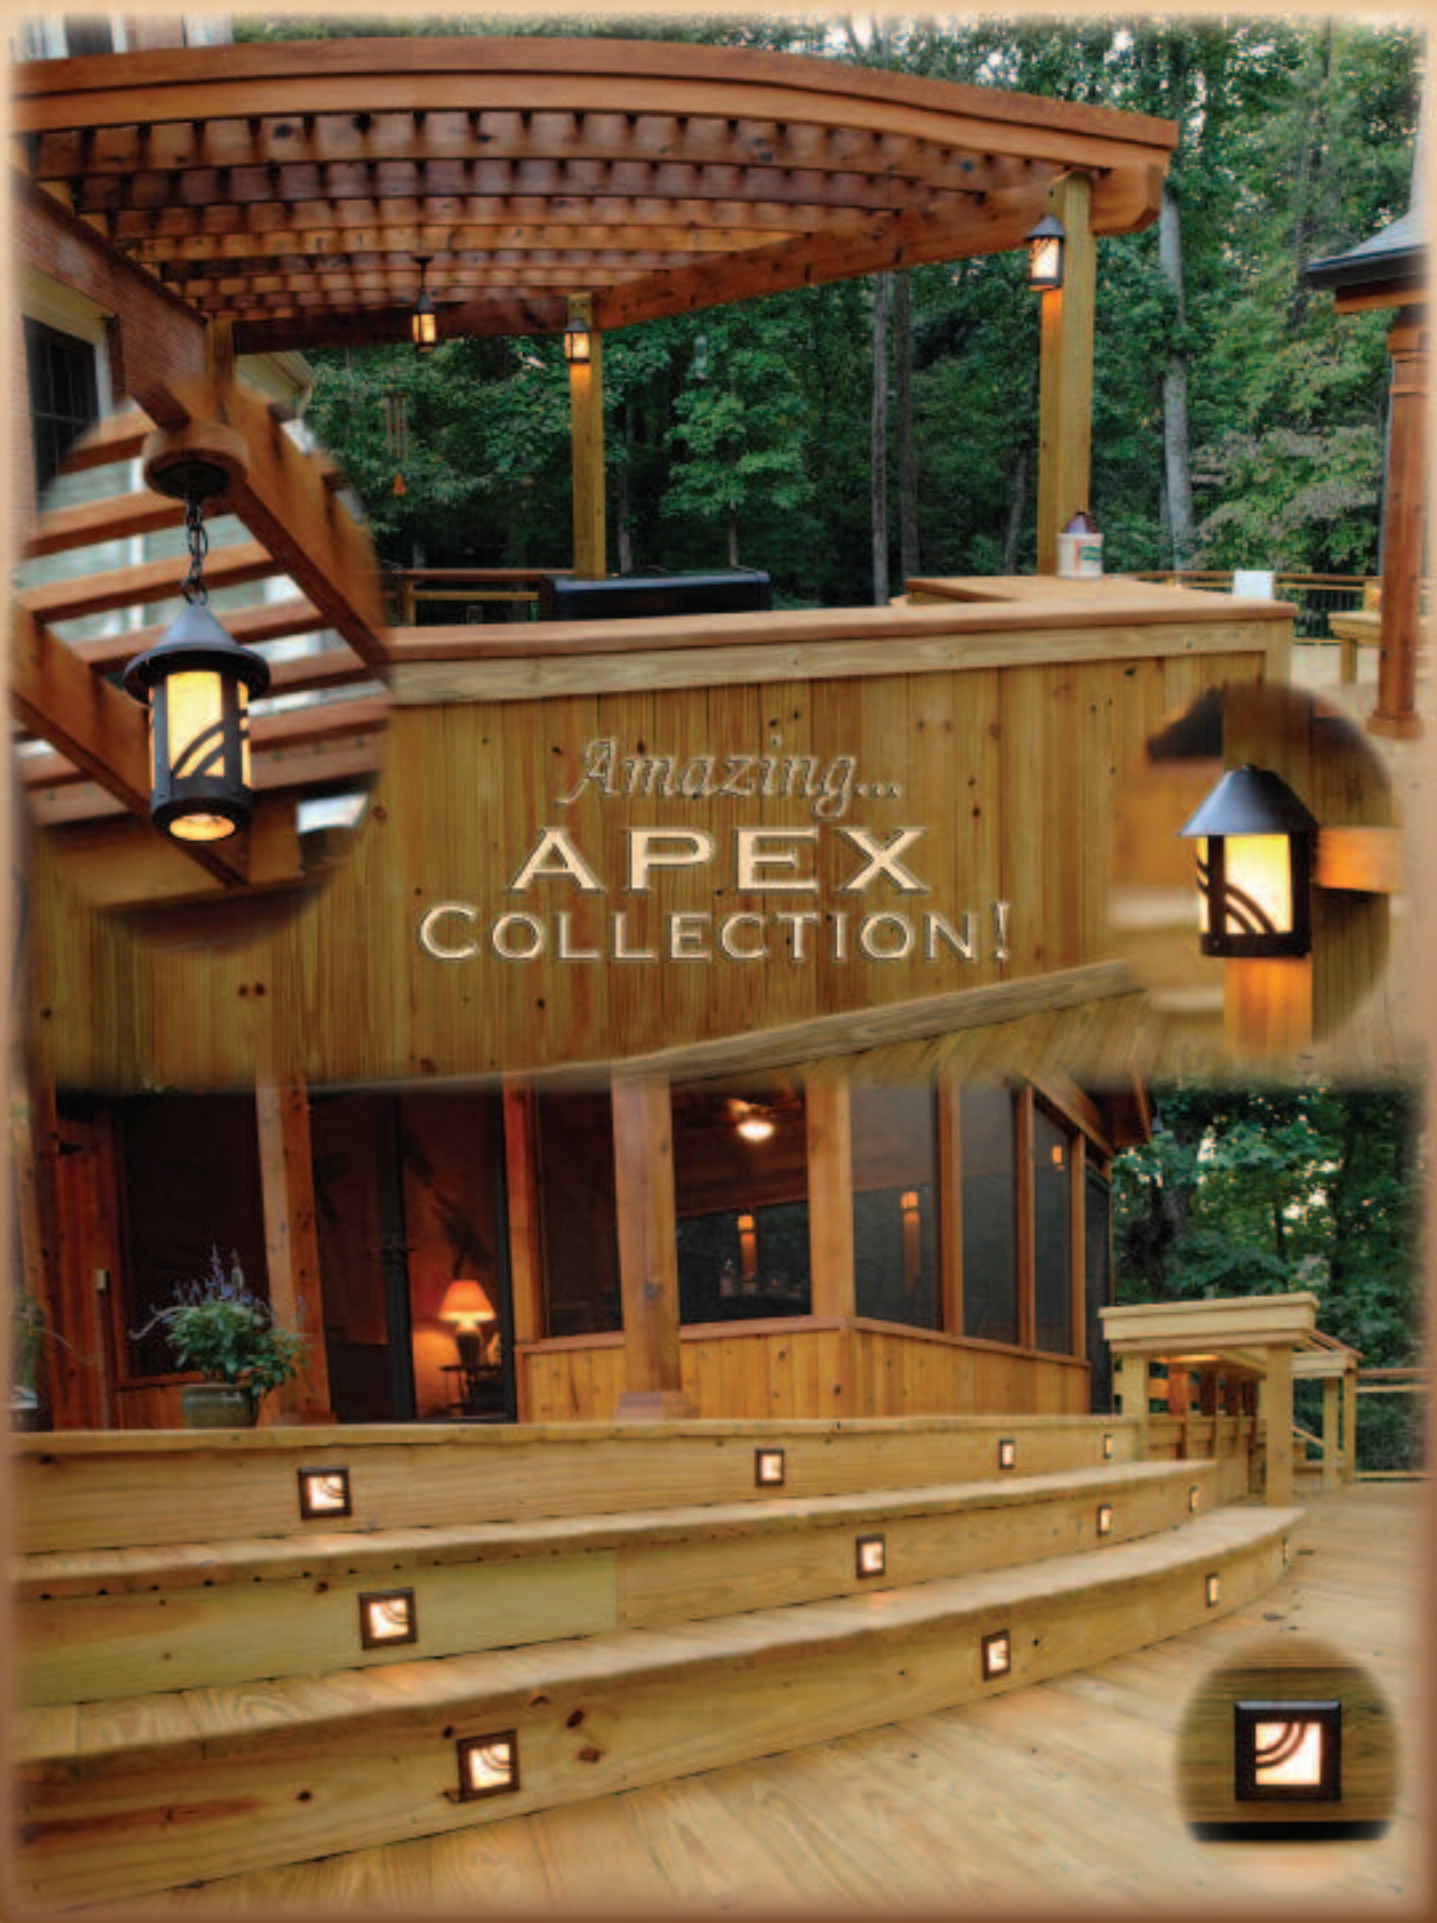

60W LED Transformer (HP-60T)

Features: 60W DC, LED transformer, (1)12V DC circuit with built in photo cell and powder coated white case

Transformers are a necessity in the operation of a low voltage lighting system, it mounts to the home's exterior and plugs directly into the GFI outdoor receptacle (usually already existing). Transformers range in size from 60 watts up to 1200 watts. The size of transformer needed is calculated by multiplying the total number of fixtures by the wattage of each fixture's bulb (i.e. 6 step lights at 7 watts each = 42 total watts and 12 railing lights at 11 watts each = 132 total watts. Add the 2 totals together for a grand total of 174 watts. In this case the transformer chosen must operate a minimum of 174 watts. It is always a good idea to purchase a transformer with 50 to 100 extra watts available. This will save money in the long run by not having to replace the entire transformer if more fixtures are added to the project in the future. Most transformers operate on a maximum of 300 watts per circuit. Consult your transformer's instruction sheet to verify how many watts are allowed per circuit and take it into consideration when you are designing your lighting layout. You never want to overload your transformer's circuit.

HIGHPOINT

DECK LIGHTING

Imagine the Ability to Custom Design Your Own...

Exterior Lighting Fixture That Would Perfectly Meet
the Décor of Your Outdoor Living Area!

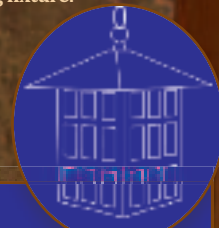

Enriching Outdoor Living... **THROUGH DESIGN!**

Doesn't seem possible in today's world of mass produced products with tired designs. HIGHPOINT Deck Lights is the only manufacturer who offers custom designed lights that meet all of our quality standards, but puts the artist's pen in the hand of the customer! Our handmade light fixtures, manufactured in the USA, are available in the same durable and attractive metal finishes; brass, copper, stainless steel and aluminum.

Our Experienced Designers & Fabricators

will be there, step by step
to insure that your lights
meet your expectations!

We help you with all aspects of the design from socket options to lamping choices, LED or Incandescent, 12 Volt and 120 Volt availability for all fixtures. All we need from you is a sketch or image and the desired dimensions and we can move towards producing your "One of a Kind" lighting fixture.
