

VANGUARD™
ALUMINUM FENCES

Forward Thinking

A fence is a symbol of permanence. Stability. Substance. Peace of mind.

So shouldn't the fence itself possess these qualities?

We think so.

Vanguard fences are built in a new, automated state-of-the-art facility that eliminates product defects and inconsistencies. Each part of a Vanguard high-strength aluminum fence goes through an eight-stage process where it is cleaned, pretreated, powder-coated and rigorously tested to ensure it meets the highest degree of quality. The process is recognized by the American Architectural Manufacturers Association (AAMA) and is AAMA-2604 certified, which ensures the highest standard of coated aluminum extrusions.

All materials are produced and assembled in the United States to the highest standards of quality. Even the screws and fasteners in a Vanguard fence are high-quality stainless steel, including nylon patches that prevent screws from backing out. The paint we use is a super-durable TGIC powder coating specifically designed for harsh exterior applications. The coating easily meets AAMA-2604 standards, which ensure five years of UV exposure in Florida, 3,000 hours of humidity and salt-spray resistance.

What does that mean to you, the homeowner? It means you'll own a fence with a lifetime warranty that will, in fact, last a lifetime. It also means peace of mind, because your fence won't need to be repainted or maintained the way a lesser quality fence would. Vanguard also allows for custom colors and designs that other manufacturers can't or won't match.

Permanence. Stability. Substance. Peace of mind. All come standard with Vanguard.

reliant

Right At Home

With eight fence styles in a variety of heights, the Vanguard Reliant Series offers the ideal fence for any property. These fences are offered in two design profiles, Traditional and Contemporary.

The Traditional profiles evoke time-honored styling with points or finials that are typical of wrought-iron fences. The Contemporary profiles feature a smooth-top finish with a combination of picket styling below the top rail. Narrow picket configurations are available in both Traditional and Contemporary designs and are a favorite of homeowners who prefer less picket space for the safety of small pets.

Each fence is available in four standard colors (black, bronze, white, green) with the option of nearly any custom color. Reliant Series fences are available in standard heights of 36", 48", 60" and 72". See page 9 for full Reliant Series specifications.

Standard gates matching the style you choose are available for every Reliant Series fence. In 3', 4', 5' or 6' widths, they can be used as a single- or double-gate application. If you're looking for a little extra style, we offer Single-Arch and Double-Arch gates for most Reliant fences (see page 8).

See page 9 for finial choices. Style D-2 comes with flared, pressed points. The fence must be built differently to accommodate finials.

avant

Standing Strong

Stronger than our Reliant Series fences, the Avant Series has larger pickets, larger posts and a deeper horizontal rail. They offer a look that's sturdier and more substantial. Avant Series fences are offered in Traditional and Contemporary styles.

Traditional designs feature points or finials reminiscent of wrought-iron styling of the past, while Contemporary designs feature a smooth-top finish with a variety of picket detailing below the top rail.

For those who want an additional touch of elegance, rings can be added to three of the Avant Series styles (A-1, C-1 and E-2). Examples of styles with rings are shown on the cover photo and at the bottom of this page.

Standard Avant Series fence heights are 48", 60" and 72". Each is available in four standard colors (black, bronze, white, green) with the option of nearly any custom color. See page 9 for full Avant Series specifications.

Standard gates are available for every Avant Series fence. They're offered in 3', 4', 5' or 6' widths and can be used in a single- or double-gate configuration. These standard gates are built to match the profile of whatever fence you choose.

For a more stylish gate, we offer Single-Arch and Double-Arch gates for every style other than our Traditional Staggered Picket Fence (B-1).

pool enclosure

A Safer Pool

When choosing a pool enclosure, safety is our number-one concern. Built to standards established by the U.S. Consumer Product Safety Commission, these Vanguard fences feature several design elements intended to prevent accidents and enhance pool security.

First, the pickets of a Vanguard pool fence have less than 4 inches of space between them to keep small children from crawling through. Rails are flush to the bottom to keep the space between horizontal rails at more than 45 inches. This feature removes possible footholds for climbing.

All Vanguard pool gates have spring-loaded hinges and self-closing, magnetic safety latches. These latches have been tested through more than 400,000 opening and closing cycles. For long-term durability, our fences are constructed with aluminum and protected with a super-durable TGIC powder coating to withstand the moisture and harsh chemicals found around pools.

Contemporary designs with smooth-top finishes are the most popular, making it easy to drape towels without snagging. However, some homeowners prefer the extra deterrent of points or finials that come with Traditional designs.

Please remember to make sure your fence meets local building regulations before ordering. Your installer should be familiar with installation requirements. If not properly installed, your fence may not meet code. Finally, make sure the fence is installed far enough away from any structure that someone can use to climb on and over your fence.

Note: Fences shown below are listed in order of popularity.

Gates

We offer a standard gate that matches every Vanguard fence style. If you choose a Traditional Straight Picket fence, that means we have a traditional standard gate with straight pickets that matches the height you've chosen. They're offered in widths of 3', 4', 5' or 6' and can be used as a single gate or as a double-gate configuration when a larger opening is required.

Most fence styles also offer the option of Single-Arch or Double-Arch gates. When wider openings are necessary for moving golf carts, lawn mowers or other large equipment, choose a Double-Arch gate with widths up to 10 feet.

All of our gates are designed and fabricated for years of maintenance-free performance. Each gate is supported by a structural heavy wall post to prevent sagging. These structural posts are available in 2", 2.5", 3" and 4" square and can be used to accent your gated entrance.

Estate Gates

Our Estate gates span driveway openings up to 24 feet wide. These gates are compatible with our fences but not identical. That's because they're constructed with larger, stronger components needed for dependable strength over the width of a driveway. Standard or inverted arch designs are available.

Custom Orders

Because we build Vanguard Fences here in the United States in a new, state-of-the-art manufacturing facility, we're able to fill custom orders that other fence companies can't or won't.

Standard Vanguard fence colors are black, bronze, white or green. If you want to upgrade to a custom color, we can match your choice to the RAL color system (the standard manufacturing color system). We'll even work with you to create a custom-designed fence at the height you specify.

For more information about custom orders and pricing, call your local Vanguard Fence dealer.

extras

Extras

For a more distinctive fence with a wrought-iron look, add decorative scrolls, caps and finials. Cast from aluminum and powder-coated, they will not rust or require maintenance. Choose black, white, green or bronze.

Finials are available only on C-1, D-2 and C-1-2 fence styles. Style D-2 in each series comes with flared, pressed points, so the fence will need to be built differently to accommodate finials. Specify when ordering.
